

AstroBridge Internal Technical Security Certification

Certificate ID: AB-INTERNAL-SEC-2026-06-17

Date: 2026-06-17

Project: AstroBridge / AstroChannel / AstroWallet-AI

Version Reviewed: v7 public channel / production pilot

Certification Statement

AstroBridge is internally certified as a production pilot system for a non-custodial full-chain intelligent intent API network.

The reviewed system provides:

- Standardized signed-intent API channel
- Non-custodial transaction flow
- Owner Signature protected operator actions
- Redis-backed queue and state layer
- PM2 service orchestration
- Docker-based P2P node service
- AstroWallet-AI wallet channel
- P2P communication foundation
- AI risk and governance modules
- Public dashboard and monitoring surfaces

Verified Results

- TypeScript build: PASS
- Project test suite: PASS
- Production dependency audit: PASS, 0 vulnerabilities
- Owner Signature Docker propagation: PASS
- 3-node Docker health test: PASS
- Redis service health: PASS
- Public dashboard availability: previously verified online

Remediation Completed

The following security improvements were completed during this certification pass:

- Removed sensitive Owner Signature value previews from logs
- Removed full frontend signature value logging
- Fixed AstroWallet-AI signature propagation
- Disabled fast-mode risk bypass by default
- Added public API rate limiting
- Disabled production test intent endpoint by default
- Confirmed production runtime dependency audit is clean

Approved Operational Scope

AstroBridge is approved for:

- Production pilot operation
- Controlled public API testing
- Partner integration preparation
- AstroWallet-AI integration testing
- P2P node pilot expansion
- Non-custodial signed-intent and signed-transaction channel operation

Explicit Limitations

This certification does not claim:

- Third-party external audit completion
- Full 180-node global decentralized production completion
- Active Astro token staking, burning, or governance
- Production zkProof or quantum-proof finality
- Unlimited exchange-grade traffic approval

Astro token economics are reserved for a future phase and are not active in the current public-channel phase.

Final Internal Certification

AstroBridge v7 is internally certified for controlled production pilot use as a non-custodial full-chain intent API network.
